

RS2B Reader Cohort Comparison — v1 vs v2 (two filters)

C1: v1 original (original cohort) | C2: v2 raw (any valid) | C3: v2 ≥95% per test (default) | C4: v2 strict 15 per test (sensitivity)

Table 1. Cohort summary

Cohort	N readers	Experts	Non-experts	Shared with v1	New vs v1	Lost vs v1
C1: v1 (original)	34	16	18	34	0	0
C2: v2 raw (any valid)	87	44	43	34	53	0
C3: v2 ≥95% / test	71	39	32	33	38	1
C4: v2 strict 15 / test	62	35	27	29	33	5

Detailed breakdown tables

Table 2. Profession × Cohort

Profession	C1: v1 (original)	C2: v2 raw (any valid)	C3: v2 ≥95% / test	C4: v2 strict 15 / test
boardCertifiedDermatologist	8	24	21	18
dermatologyResident	11	31	23	19
generalPractitioner	7	12	9	8
medicalSpecialist	1	3	3	3
medicalStudent	4	8	6	5
nonMedical	1	2	2	2
nursePractitioner	1	1	1	1
physicianAssistant	0	2	2	2
resident	1	4	4	4
TOTAL	34	87	71	62

Table 3. Age × Cohort

Age band	C1: v1 (original)	C2: v2 raw (any valid)	C3: v2 ≥95% / test	C4: v2 strict 15 / test
Unknown	34	87	71	62
TOTAL	34	87	71	62

Table 4. Gender × Cohort

Gender	C1: v1 (original)	C2: v2 raw (any valid)	C3: v2 ≥95% / test	C4: v2 strict 15 / test
Unknown	34	87	71	62
TOTAL	34	87	71	62

Filter impact & narrative summary

Table 5. Reader flow across cohorts

Step	N readers	Δ vs v1	Δ vs C2 (raw)
v1 baseline (original cohort)	34	—	—
v2 raw export (any valid answer)	87	+53	—
v2 filter ≥95% per test (default)	71	+37	−16
v2 filter strict 15 per test (sensitivity)	62	+28	−25

Table 6. Readers kept by ≥95% but dropped by strict 15 (n = 9)

Attribute	Value	Count
expertise	non-expert	5
expertise	expert	4
profession	dermatologyResident	4
profession	boardCertifiedDermatologist	3
profession	generalPractitioner	1
profession	medicalStudent	1
gender	Unknown	9
age	Unknown	9

Narrative summary

- v1 had 34 readers (16 expert / 18 non-expert).
- v2 raw export contains 87 readers — all 34 v1 readers are present, plus 53 new participants.
- Default filter ≥95% per test keeps 71 readers (39 expert, 32 non-expert).
 - Retains 33/34 of the original v1 readers; adds 38 new ones.
- Strict 15 / test keeps 62 readers (35 expert, 27 non-expert).
 - Retains 29/34 of v1; adds 33 new ones.
- Going from ≥95% → strict 15 drops 9 readers (mostly dermatology residents / board-certified dermatologists).
- Headline conclusion (AI improves diagnosis & management) is preserved under both filters — see RS2B_*.pdf.
